About the Pharmacy PGY-1 Residency Program

- Columbus Regional Health provides a unique environment that offers large hospital services with a close knit team feel. Our cardiac cath lab, new emergency department, expanded oncology department, and pulmonology clinic are all state-of-the-art and allow our residents to encounter a diverse patient population and have exceptional learning experiences.
- Being part of the CRH pharmacy residency program provides a variety of opportunities ranging from medication management in an outpatient setting to critical care.
- Our pharmacy residents will have a wide range of rotations including six required learning experiences, three elective rotations, and four longitudinal projects tying all of our learning experiences together.
- All of our rotations and preceptors strive to achieve a well-rounded and meaningful PGY-1 residency that prepares our residents for the next steps in their pharmacy careers.

CRH PGY-1 Residency Learning Experiences

- Residents will complete the following learning experiences and scheduled events:

Required Learning Experiences (5 week learning experiences, unless otherwise noted)	Required Longitudinal Learning Experiences (10 month learning experiences)	Elective Learning Experiences (5 week learning experiences, unless otherwise noted)

CRH PGY-1 Core Residency Requirements

In order for the resident to successfully complete the Columbus Regional Hospital PGY-1 Residency Program, he/she must complete or perform the following items:

- “Achieved for Residency” on at least 85% of all required goals and objectives with no active “Needs Improvement”
- Completion of a service component, which includes inpatient pharmacy staffing responsibilities
- Completion of a year-long residency project (Project preceptor and RPD to determine if project has been completed)
- Presentation of project design and available results at the Midyear Clinical Meeting or equivalent meeting determined by the residency program (poster presentation)
- Presentation of project results at the Great Lakes Resident Conference (live presentation) or equivalent meeting determined by the residency program
- Presentation of one Continuing Medical Education session (CME) to physicians and other professionals
- Presentation of two Pharmacy Learning Sessions (PLS) to pharmacy staff
- Completion of a DUE/MUE and presentation to the Pharmacy & Therapeutics Committee
- Completion of a medication class review or full drug monograph for formulary addition or presentation to the Pharmacy & Therapeutics Committee
- Completion of a policy review and presentation to the Pharmacy & Therapeutics Committee.
- Completion of a Medication Safety project (assigned by preceptor)
- Attendance at 4 or more P&T meetings during the residency year
- Attendance at 4 or more Medication Safety Team meetings during the residency year
- Completion of a quality improvement project
- Participation in recruitment efforts, such as ASHP Midyear Clinical Meeting Residency Showcase, IPA Pharmacy Residency showcase, interviews, selection, and other events as determined by the program
- Completion of residency portfolio on the K:/drive
- Successful completion of Basic Life Support and Advance Cardiac Life Support curriculum
