

Norton Healthcare PGY2 Oncology Pharmacy Residency

Residency Program:

Residency Type: PGY-2
Duration/Type: 12 months
Number of positions: 1
Application Deadline: Listed on PhORCAS: January 6, 2024
Starting Date: Estimated July 1, 2024
Estimated Stipend: \$56,160
Interview Required: Yes

PGY2 Program Purpose: PGY2 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification.

Learning Experiences:

Rotational:

- Breast Cancer, Gynecologic Malignancies, and Sarcoma
- Gastrointestinal Cancers
- Genitourinary Cancers, Head and Neck
- Hematology: Leukemia's, Lymphomas, Cellular Therapies

Norton Healthcare PGY2 Oncology Pharmacy Residency Program Structure

The residency year is divided into 4 quarters, each with 2 or 3 clinical rotations. All clinical rotations are 4 to 6 weeks in length and are led by a clinical pharmacist preceptor with expertise in disease state of focus. Direct patient care is expected throughout all clinical rotations. While clinical rotations are structured to ensure experience is gained in all required learning activities, these experiences and the knowledge gained will routinely cross between and among multiple rotations.

Longitudinal learning experiences in Investigational Drug Services, Medication Safety & Quality, Practice Management & Leadership, and the Resident's Research Project are required and span the full 12-month residency year. The staffing component is also required and expected to start as soon as the resident proves related competencies but no later than the beginning of quarter 2.

	Quarter 1 July - September	Quarter 2 October - December	Quarter 3 January - March	Quarter 4 April - June
Quarterly Program Focus	The first quarter is focused on orientation and establishing the resident as a member of the clinical team. The resident will select or be appointed assignment with a NCI or System committee related to Medication Safety and Quality.	Rapid advancement of clinical involvement and responsibilities. No rotational experiences are delivered in December instead focus is on progress in longitudinal learning experiences.	Each resident's schedule is shaped to allow for progressive development of knowledge and skills. Rotations later in the year will involve more autonomy, more responsibility, and/or different tasks than rotations delivered earlier in the year. Residents should expect to be consistently challenged (i.e. able to demonstrate progressive achievement) over the residency year. Based upon a resident's quarterly development plan, RPD and preceptor may adjust the requirements for successful completion of the learning experience accordingly. Learning experiences are not able to be repeated.	
Longitudinal Learning Experiences	Investigational Drug Services (12 Month)*			
	Medication Safety & Quality (12 Month)*			
	Practice Management / Leadership / Service (12 Month)*			
	Research / PGY2 Residency Project (12 Month)*			
	Staffing (9 Month)*			
Rotational Experiences[#]	Orientation / Supportive Care Outpatient Hematology, Gastrointestinal Cancers	Breast Cancer, Gynecologic Malignancies, and Sarcoma	Lung, CNS Cancers, Melanoma, Head/Neck Cancers, Genitourinary Cancers	Hematology: Leukemia's, Lymphomas, Cellular Therapies Pediatrics / BMT Elective
Required Conference Participation	Norton Cancer Institute Fall Oncology Symposium	ASHP Mid-Year Clinical Meeting	HOPA Annual Conference	Great Lakes Pharmacy Residency Leadership Conference

* Required Longitudinal Experiences

[#] The cells above outline which quarters learning experiences are typically scheduled to ensure that knowledge and skill sets are built progressively. Based upon an individual resident's progression throughout the year and customized plan, as well as preceptor availability, consideration could be given to modification of this schedule.
